Profile

Value Proposition

Simplify complex workflows so users move faster with less friction and greater clarity.

Build scalable design systems that maintain consistency and enable teams to ship cleanly across products.

Accelerate delivery with AI-augmented research, information architecture, rapid prototyping and automation.

Skills

Accessibility, AI Design, Automation, Component Libraries, Design Systems, Information Architecture, Interaction Design, Mobile, Product Strategy, Prototyping, Responsive Design, Systems Thinking, UI Design, Usability Testing, User Flows, User Research, Vibe Coding, Wireframes

Tools

Adobe, Agentic AI, Claude, Cursor, Design Tokens, Figma, Figma Libraries, Framer, GitHub, Hugging Face, LLM, Material, n8n, Next.js, Notion, Ollama, OpenAI, OpenRouter, React, Shopify, Tailwind, Typescript, Vercel, shadcn/ui

Education

Board Infinity: AI-integrated design,
Google Career: UX design, Seattle
Central College: Web design, University
of Illinois at Chicago: Graphic design

Experience

Product Designer — Mike Marchitto Design — April 2017–Present

Design web and mobile products for clients like Microsoft and Starbucks using AI-powered workflows across research, IA, flows, interaction, and UI. Improved clarity, reduced friction, and increased design-to-dev efficiency by 30% while supporting multiple product teams.

Product Designer — National Restaurant Association — June 2024–March 2025

Overhauled ServSafe's enterprise platform by clarifying IA, improving user flows, and building a scalable design system with components and tokens. Improved course completion 18% and reduced friction 25% across mobile and web training experiences for diverse users.

Product Designer — Microsoft Admin Center — June 2023–February 2024

Improved enterprise cart workflows through research, IA, wireframes, prototypes, and usability testing. Reduced cart errors 20% and increased admin efficiency 15%, strengthening clarity, reducing friction, and improving reliability across complex provisioning paths used daily by global admins.

Product Designer — GloriFi — November 2021–February 2023

Delivered a unified financial wellness platform using research, IA, flows, and a cross-platform design system. Supported a 40k+ beta launch, reduced UI inconsistencies 45%, and improved onboarding clarity across mobile and web, strengthening overall usability.

Product Designer — Remitly — January 2020–April 2021

Enhanced global money-transfer journeys by refining responsive design, strengthening interactions, and improving accessibility. Increased conversion 12% and reduced user errors 18%, improving clarity and consistency across mobile and web experiences worldwide.

Product Designer — Microsoft Hits — April 2019–December 2019

Modernized Microsoft's research repository by improving IA, wireframes, prototypes, and UI system structure. Increased workflow efficiency 25% and reduced ingestion friction 30%, creating a cleaner, more consistent experience for internal research teams.

Product Designer — Mentor Creative Group — June 2018–January 2019

Designed Ecommerce and campaign experiences for Eddie Bauer and Starbucks, modernizing UX, refreshing visuals, and creating clearer, more consistent journeys. My UX, visual design, and system work increased navigation efficiency 15%, boosted PDP engagement 18%, and improved campaign consistency 25%.
