

Product Designer blending UX, systems thinking, and AI Augmented workflows to design and ship intuitive and accessible digital experiences across web and mobile.

Experience

Mike Marchitto Design, April 2025–Present

Independent UX practice advancing AI-augmented design and development. I use Cursor, OpenAI, n8n, and a modern Next.js stack to prototype, build, and ship production-ready digital experiences grounded in user-centered design.

ServSafe, June 2024–March 2025

Designed digital platforms by conducting user research, applying interaction design and accessibility standards, creating wireframes and prototypes, and delivering a scalable design system to improve usability and team alignment.

Microsoft, June 2023–February 2024

Enhanced Microsoft Admin Center and enterprise cart functionality through end-to-end UX design: driving research, wireframes, prototypes, usability testing, and iterative collaboration with developers to optimize workflows.

GloriFi, November 2021–February 2023

Designed FinTech app and website leading the UX process from wireframes and prototypes to hi-fidelity screens, building a unified design system, and collaborating with developers in agile sprints to deliver scalable systems.

Remitly, January 2020–April 2021

Improved engagement for a digital payments startup by applying responsive web design, refining interaction flows, and elevating visual content across web and email platforms, supported by usability testing and accessibility standards.

Microsoft, April 2019–December 2019

Created Microsoft Hits, a research repository software, applying best practices across the full UX process including research, wireframes, prototypes, UI design, and agile handoff, ensuring alignment with development teams.

Profile

Skills

Accessibility, AI-Augmented Design, Design Systems, Design Thinking, Information Architecture, Interaction Design, Mobile Design, Problem Solving, Prototyping, Responsive Web, Usability Testing, UX Design, UX Research, Vibe Coding, Visual Design, Wireframing, Workflow Automation

Tools

Adobe, CSS, Cursor, Figma, GitHub, Google Material, HTML, Jira, Microsoft Fluent, n8n, Next.js, OpenAI, React, Tailwind, TypeScript, Vercel, Webflow

Education

Board Infinity—AI Integrated Design, Google Career—UX Design, Seattle
Central College—Web Design, University of Illinois at Chicago—Graphic Design
