

Curriculum Vitae

Profile

Summary

Senior product designer with 10+ years designing and shipping complex, user-centered products. Strong in UX flows, systems thinking, and high-craft execution. Skilled at simplifying complexity, collaborating with engineering, and delivering clear, intuitive experiences in fast environments.

Skills

Accessibility, AI Design, Automation, Component Libraries, Cross-Functional Collaboration, CSS, Design Systems, Heuristic Evaluation, HTML, Information Architecture, Interaction Design, Product Strategy, Rapid Prototyping, Responsive Design, Stakeholder Management, Systems Thinking, UI Design, Usability Testing, User Flows, User Research, UX Architecture, Vibe Coding.

Tools

Adobe, Agentic AI, Claude, Cursor, Design Tokens, Figma, Git, GitHub, Hugging Face, n8n, Next.js, Notion, Ollama, OpenAI, OpenRouter, React, shadcn/ui, Storybook, Tailwind, TypeScript, Vercel

Education

Board Infinity — Certification — AI-Integrated Design

Google Career — Certification — UX Design

Seattle Central College — Certification — Web Design

University of Illinois at Chicago — BFA — Graphic Design

Experience

Product Designer — Studio Kihto — April 2017 – Present

Lead end-to-end web and mobile design for an independent consultancy. Execute comprehensive product discovery for Nutrilucent, driving stakeholder alignment and feature scoping. Architect scalable design system updates and organization management infrastructure for SmartResponse.

Product Designer — National Restaurant Assoc. — June 2024 – May 2025

Overhauled ServSafe's enterprise training platform clarifying IA, strengthening user flows across mobile and web, building a scalable design system with component libraries and design tokens. Improved completion 18% and reduced friction 25%.

Product Designer — Microsoft Admin Center — June 2023 – February 2024

Improved enterprise cart workflows across web and mobile through UX research, IA, wireframes, prototyping, interaction design, and usability testing. Reduced cart errors 20% and increased admin efficiency 15% across complex provisioning paths.

Product Designer — GloriFi — November 2021 – February 2023

Delivered a unified financial wellness platform with research, IA, user flows, and a cross-platform design system ensuring enterprise visual consistency. Spearheaded design execution for a 40k+ user launch, reducing UI inconsistencies 45% while optimizing mobile onboarding completion.

Product Designer — Remitly — January 2020 – April 2021

Enhanced global money-transfer journeys by refining responsive mobile and web design, strengthening interactions, improving accessibility, and validating changes through usability testing. Increased conversion 12% and reduced user errors 18%.

Product Designer — Microsoft Hits — April 2019 – December 2019

Designed Microsoft's research repository by restructuring complex enterprise IA, creating wireframes, prototyping, and building a unified design system. Improved workflow efficiency by 25% and reduced ingestion friction 30% for internal research teams.
