Product Designer Building Modern AI-Powered Digital Experiences

Profile

Skills

Accessibility, AI Design, Automation, Component Libraries, CSS, Design Systems, HTML, Information Architecture, Interaction Design, Product Strategy, Rapid Prototyping, Responsive Design, Stakeholder Management, Systems Thinking, UI Design, Usability Testing, User Flows, User Research, Vibe Coding

Tools

Adobe, Agentic AI, Claude, Cursor, Design Tokens, Figma, GitHub, Hugging Face, n8n, Next.js, Notion, Ollama, OpenAI, OpenRouter, React, shadcn/ui, Tailwind, Typescript, Vercel

Education

Board Infinity — Certification — AI-Integrated Design
Google Career — Certification — UX Design
Seattle Central College — Certification — Web Design
University of Illinois at Chicago — BFA — Graphic Design

Experience

Product Design — Mike Marchitto Design — April 2017 – Present

Design web and mobile products for clients like Microsoft and Starbucks using AI-powered workflows across user research, IA, user flows, interaction design, and UI design, creating scalable experiences that reduce friction and support faster, more confident delivery.

Product Design — National Restaurant Assoc. — June 2024 – May 2025

Overhauled ServSafe's enterprise training platform clarifying IA, strengthening user flows across mobile and web, building a scalable design system with component libraries and design tokens. Improved completion 18% and reduced friction 25%.

Product Design — Microsoft Admin Center — June 2023 – February 2024

Improved enterprise cart workflows across web and mobile through UX research, IA, wireframes, prototyping, interaction design, and usability testing. Reduced cart errors 20% and increased admin efficiency 15% across complex provisioning paths.

Product Design — GloriFi — November 2021 – February 2023

Delivered a unified financial wellness platform through research, IA, user flows, and a cross-platform design system supporting consistency. Supported a 40k+ launch and reduced UI inconsistencies 45% while improving mobile onboarding clarity.

Product Design — Remitly — January 2020 – April 2021

Enhanced global money-transfer journeys by refining responsive mobile and web design, strengthening interactions, improving accessibility, and validating changes through usability testing. Increased conversion 12% and reduced user errors 18%.

Product Design — Microsoft Hits — April 2019 – December 2019

Designed Microsoft's research repository by restructuring IA, creating wireframes, prototyping, and building a unified design system. Improved workflow efficiency 25% and reduced ingestion friction 30% for internal research teams.
