

Product Designer building modern AI-powered digital experiences

A design practice grounded in UX, systems thinking, and AI-augmented workflows to create clarity, structure, and scalable patterns. The work emphasizes reducing friction, strengthening product decisions, and supporting teams as they ship confidently across web and mobile.

Experience

Mike Marchitto Design, April 2025–Present

Runs an independent UX practice designing AI-augmented web and mobile products for clients needing user-centered solutions. Ships production ready experiences that reduce friction and improve product clarity.

ServSafe, June 2024–March 2025

Created enterprise training platform by clarifying IA, strengthening flows, and building a scalable design system. Improved course completion, reduced friction and increased adoption across safety training programs.

Microsoft Admin Center, June 2023–February 2024

Improved enterprise cart workflows by leading research, IA, wireframes, prototypes, and usability testing across admin tasks. Reduced errors, clarified decision paths and strengthened workflow efficiency for admins.

GloriFi, November 2021–February 2023

Delivered a unified financial wellness platform through research, IA and design system across mobile and web. Supported a successful beta launch with 40k+ downloads and strong adoption validating product direction.

Remitly, January 2020–April 2021

Enhanced payments experience by refining responsive flows, strengthening interactions, and improving clarity through testing and accessibility. Increased conversion and consistency across key money-transfer journeys.

Microsoft Hits, April 2019–December 2019

Elevated Microsoft's research repository platform restructuring IA, creating wireframes, prototypes and building a unified design system. Increased satisfaction, reduced ingestion friction and improved efficiency.

Profile

Skills

Accessibility, AI-augmented design, Design systems, Design thinking, Information architecture, Interaction design, Mobile design, Problem solving, Prototyping, Responsive web, Usability testing, UX design, UX research, Vibe coding, Visual design, Wireframing, Workflow automation

Tools

Adobe, Claude, CSS, Cursor, Figma, GitHub, Material, HTML, Jira, Fluent, Framer, n8n, Next.js, OpenAI, React, Tailwind, TypeScript, Vercel, Webflow

Education

Board Infinity: AI-integrated design, Google Career: UX design, Seattle Central College: Web design, University of Illinois at Chicago: Graphic design
